

# MAINTENANCE WORKS

## BONBEACH PRIMARY SCHOOL

12 December 2017

The Victorian School Building Authority is committed to working with Victorian government schools to ensure that school premises are safe, secure and well maintained.

The Victorian School Building Authority (VSBA) is working closely with Bonbeach Primary School to undertake repair and maintenance works.

Repair works are required due to termite damage found in areas of the main school building, which has in turn caused concern regarding the structural integrity of some external walls.

Emergency maintenance works have commenced and include:

- hoarding off the area around the building and installing propping so that the external wall is secure and safe; and
- a detailed structural review has been completed by an engineer.

The exact scope of repair works will be determined over the next week in consultation with the structural engineer and the school Principal.

We are conscious of having the repairs completed as quickly as possible to minimise the disruption to students and staff and will advise staff and the school community of the timeline over the coming weeks.

The safety of students, staff and the wider school community is of the utmost importance to the VSBA.

We appreciate your patience and support while these works are conducted at Bonbeach Primary School.

Further updates will be provided as the works progress in the coming weeks and months.
